Claims 14-17 have been canceled.

3. The following is an examiner's statement of reasons for allowance:

Regarding claims 1-8, no prior art of record teach or fairly suggest a method of assessing spinal reposition sense where a test subject is engaged in a thoracolumbar movement with a range of motion through the sagittal plane, a flexion position is selected that has a vertical coordinate and a horizontal coordinate, the subject's ability to reposition to said flexion position is recorded, and the vertical coordinate and horizontal coordinate of the sensed reposition is compared with the coordinates of the selected flexion position.

Regarding claims 9-13, no prior art of record teach or fairly suggest a method of using linear coordinates to determine the angle of thoracolumbar flexion in the sagittal plane, where the subject is seated on a level seating surface, vertical linear coordinates and horizontal linear

coordinates relative to a provided vertical reference are measured at C7-T4 on the subject, and the angle of flexion of the thoracolumbar spine is trigonometrically determined using the measured linear coordinates.

Regarding claims 18-22, no prior art of record teach or fairly suggest a method of using a thoracolumbar measurement system having a vertical reference component positioned perpendicular to a horizontal reference component within a reference housing component, and a level seating component supporting the vertical reference component, to clinically assess the spinal reposition sense of a test subject.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
